<b>Stay Sit 3 minutes</b>											
<b>Stay Sit 6 minutes</b>											
<b>Stay Sit 10 minutes</b>											
<b>Stay Down 30 seconds</b>											
<b>Stay Down 1 minute</b>											
<b>Stay Down 3 minutes</b>											
<b>Stay Down 6 minutes</b>											
<b>Stay Down 10 minutes</b>											

You should practice duration to a stay first, before adding in things like distractions or the distance I walk away from a dog in a stay. Why? It takes time for me to walk ten feet from my dog and return. In order to set my dog up for success, I need to build a solid foundation of duration. When working your dog with any obedience cue in public, you should always have a leash on for safety.
